

BeeSkilled- Cloud Computing with AWS

WEEK 1 – Introduction to Cloud Computing & AWS Basics

Topics Covered

- What is Cloud Computing? (IaaS, PaaS, SaaS)
- Cloud deployment models (Public, Private, Hybrid)
- AWS Overview and Free Tier setup
- AWS Global Infrastructure: Regions & Availability Zones
- AWS Management Console, IAM (Users, Groups, Roles, Policies)

Assignments

1. Create and Configure AWS Account

- Set up an AWS Free Tier account.
- Create IAM users and assign roles.
- Explore AWS Management Console.

2. Explore Core AWS Services

- Identify key services (EC2, S3, RDS, Lambda).
- Create a summary report describing their functions.

Mini Project

IAM & S3 Hands-On Project

- Create IAM user with specific permissions.
- Create an S3 bucket and upload static files.
- Configure public access and test bucket policy.

Learning Outcome

Students understand cloud computing fundamentals, AWS account setup, and basic security management.
